What can an English professor do with 470,000 books?

Ted Underwood
English, UIUC
Propportion of novels in first-person 1720-1900

The y axis represents the mean probability that a given volume of fiction will belong to the class "first-person narration." Note that each volume is assigned a probability on a continuum between 0 and 1.
Ratio of pre-Norman-Conquest to post-Norman-Conquest words.
